### Copper Harbor Trails

At the northernmost point of the Keweenaw Peninsula, the village of Copper Harbor is surrounded by stunning scenery and an amazing complex of more than 50 miles of hiking and mountain biking trails, rated the best MTB trails in all of Michigan by the International Mountain Bicycling Association (IMBA).

These expertly designed, purpose-built MTB trails were thoughtfully carved into the rocky outcroppings, escarpments and bluffs towering above the Lake Superior shoreline. You'll find trails for every skill level, from beginner and intermediate to the most advanced. Most trails allow trail running, hiking and mountain biking, while some are exclusively hiking or downhill biking only. Bikers yield to hikers. Downhill bikers yield to uphill bikers. The downhill only, or "gravity," trails will challenge your technical skills. Travel east of downtown, past Fort Wilkins Historic State Park, to explore the newest MTB trails in East Bluff Bike Park, including the scenic Keweenaw Point Trail.
